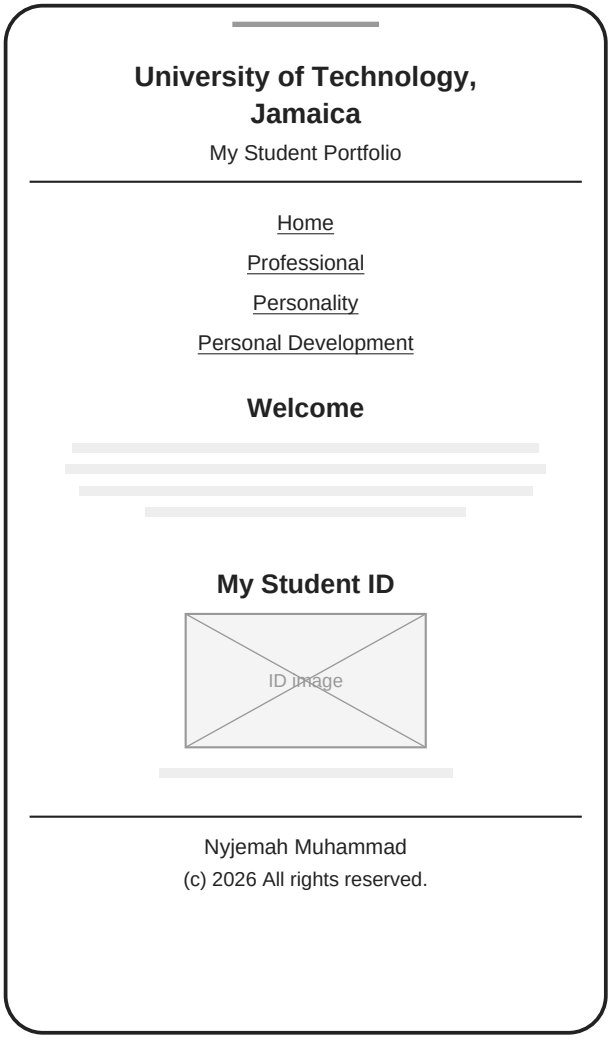
a. Storyboard

Two layout designs are shown, one for mobile and one for desktop. The Home page is drawn as the example. All four pages (Home, Professional, Personality, Personal Development) share the same header, navigation and footer, and only the sections in the middle change.

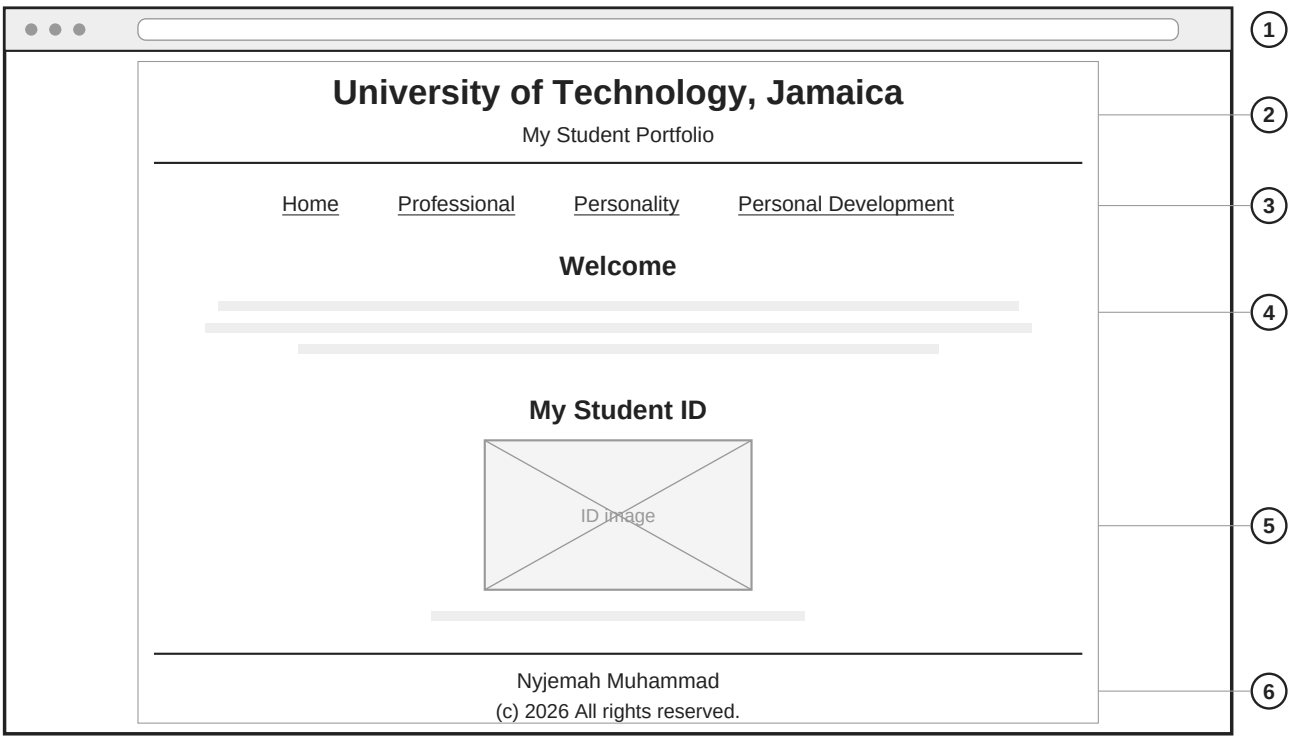
Mobile layout (screens under 600px wide)



1. Screen under 600px: one column, full width, 15px padding, everything centred.
2. Header: university name (h1) and page title (h2), thin line underneath.
3. Navigation: the 4 links are stacked in a column (list items shown as blocks).
4. Section: heading and a short centred paragraph.
5. Student ID image, 250px wide with a thin border. Clicking it opens an email to my tutor.
6. Footer: name and copyright.

Pages on mobile keep the same order: header, navigation, one or more sections, footer. Tables and images shrink to fit the screen width.

Desktop layout (screens 950px and wider)



1. Desktop screen, 950px and up: the content sits in a centred column 900px wide.
2. Header: university name and page title on one line with a thin line underneath, h1 is larger on desktop.
3. Navigation: the 4 links sit side by side in one row, centred.
4. Section: heading and a short centred paragraph.
5. Student ID image, 250px wide, clickable to email my tutor.
6. Footer: name and copyright.

Between 600px and 949px (tablets and small laptops) the layout is the desktop one in a narrower 700px column, with the navigation in one row.
